BIG GROWTH FOR CENTRAL FLORIDA RESTORATION COMPANY

APRIL 16, 2015 – LONGWOOD, Fla. -- Recromax, Central Florida's premier restoration services company, announces expansion into the Tampa, Ocala, and Jacksonville markets, creating 15 new local jobs!

This report follows continued growth from 2014, leading Recromax to hire IICRC – certified service technicians and project managers to fill these skilled roles and support the property restoration, rehabilitation, and reconstruction requirements of these expanding areas. "We have added three more fleet vehicles, gained tremendous employment opportunity, and identified significant revenue growth forecasted through 2015 and 2016", stated Brian Hettinger, Recromax's Co-founder and General Manager.

According to the research conducted by the University of North Carolina at Chapel Hill¹, it is clear that the U.S. has a highly active restoration industry, contributing growth and jobs to the national economy in the short-term, as well as long-term value and cost-savings. "Recromax is a perfect example of this growth and the impact it is making on our local economy," said Kenny Padgett, Recromax's Co-Founder and Managing Partner, "Through new job creation, a recent commercial building acquisition, and an ever growing fleet of vehicles, we are making a real difference."

Founded in 2012, Recromax has added over 30 jobs and returned normalcy to hundreds of Central Florida property owners' lives through restoration, rehabilitation, and reconstruction of residential and commercial properties. A steady emphasis on customer experience, team collaboration, and delivering on the company promise has proven to be the path to success.

About Recromax
